Exercise - Components & Panels

15 JUNE 2017 by Mark Price (http://blog.devslopes.com/author/mark/)

You are going to build a React website:

1. That looks almost identical to the image below

2. You must use React components

3. Use Bootstrap Cards and the Bootstrap grid system. If you don't like or want to use Bootstrap you can use another CSS framework or your own custom CSS

4. Website should be responsive and look similar to the 2nd image below

5. Use whatever colors you want

6. Try and keep font sizes similar to the images below

7. Push your project to Github
